TO WHOM SO EVER IT MAY CONCERN

It is to certify that a 30,000 litres per day solar water purification plant has been installed by Aqua Infinitum GmbH, Switzerland in the month of November 2011 at the village of Saila Khurd, District Hoshiarpur, Punjab.

The plant is running round the clock 24 hours per day 7 days per week with solar energy only and without any supply from the grid. Further, the plant is fully automatic with a scheduled backflush process to clean the filters, and it does not require any manual maintenance.

Treatment of the source water is 100% chemical free, and the plant is carbon neutral.

We are very much satisfied with the performance of the system and we wish all the success to Aqua Infinitum.

Sincerely

Dr. Gurdev Singh Gill
President
Indo-Canadian Village Improvement Trust
