To whom it may concern:

This letter is to advise that a solar powered water purification plant was installed by Aqua Infinitum GmbH in November 2011, adjacent to Kuantum's Paper plant, located in the village of Saila Khurd, District Hoshiarpur, Punjab.

The system has been providing high volumes of purified drinking water to the village population on a continuous NAIA 24 hours per day.

Equipment is highly energy efficient, operating 100% from solar power with sufficient power stored for a minimum of 1½ days of low solar radiation. During the last winter season and periods of dense fog we measured zero loss of production.

The Aqua Infinitum system is fully computerized with automated backflusing of filters and has required zero maintenance from our engineers since plant commissioning in 2011. Moreover the four stage purification process is 100% chemical free meaning that the system is ecologically friendly and has zero carbon footprint.

We are most satisfied with the Aqua Infinitum purification installation.
