Dear Sir

RE: Appreciation of the New Water System

I write in appreciation of the new trunz water system.

The school have seen a great improvement with the children regarding the new water system. Before the school uses water which is pumped from the nearby creek and directly to the taps. With the installation of the new water system there has been an improvement in the children's attendance compared to previous years before the system was installed.

The school has also seen improvement in the children's health status with regards to water borne diseases such as stomach- ache and diarrhoea. Before the school used to have stomach ache cases twice or three times a week. Now it has been 5 months since the installation of the water system and there has not been any report of any of the diseases mentioned above.

Therefore, the school is very grateful for the water system as it is a great help to the school and as well as the whole Solevu Community.

The school hopes that this will not be the last donation but a beginning of a new friendship.

We look forward to your full support in future.

Yours faithful

for 
Mr Pascal Peckham
(Head Teacher)
